****It is necessary to inform the lab if any horse has been vaccinated with **Duvaxyn EHV 1, 4** to eliminate interfering antibodies and to ensure there is no delay in testing. Vaccination could result in a false positive EVA ELISA result; the sample will require further testing using the VNT test which can take another 5 days and will have an additional charge of **€22 + VAT**. To avoid any delay in results please let us know when submitting samples whether you require VNT or ELISA and the horses' vaccination status.**

It is the responsibility of the referring Veterinary Surgeon to ensure that swabs are collected from the correct anatomical location from both mares and stallions as defined in the Equine Codes of Practice which are available from the Irish Thoroughbred Breeders Association (ITBA).

I agree to allow results of the examination to be given to the Veterinary Research Laboratory, of the Department of Agriculture, Food & Forestry to carry out further examinations and tests, of said specimens, as may be thought necessary,

Signed _____

Submitting Vet Surgeon
